

The following recipe is for Type I's to use when dyeing whites to Winter White.

Materials Needed:

1 package of RIT® dye – Golden Yellow or Lemon Yellow

Salt

Large Pot, Bucket or Sink

Hot Water

Stove Top Method:

1. Bring 4-6 cups of water to boil
2. Add ½-1 cup salt to water and stir
3. Add ½ tsp. of either color dye to water and salt mixture, mix well with whisk
4. Before dyeing your clothes get them wet with lukewarm water
5. Submerge clothes in pot (or transfer boiling dye mix to bucket or sink and then put in clothes)
6. Stir clothes in water for 10 seconds, pull clothes out and determine if you like the color (if you want it darker put back in dye and stir longer)
7. Remove clothes from dye, rinse with cool water
8. Hang to dry or run in regular wash cycle (you could wash with other whites you want to dye as some of the dye will bleed – this would be an easy way to dye more clothes, but keep in mind those will be a lighter version than the original dyed clothing)

Good luck and have fun!
