

## Type 3 Dye Recipes

You can use the following recipes to make a Tint, Tone or Hue the perfect Shade.

Dynamic, dirty and rich are words to describe the look you want to achieve with the finished article that is being dyed. The under tones of your clothing should be rich, gold, rusty or dirty. Remember Type 3 Shades are warm.

If the garment is too pure in color, you can tone it down by dipping it in the color's opposite, for example if it were pure red, you could dip it in green. The existing color of the garment will affect the final outcome.
